OBJECTIVE

I am looking for the position of software developer where my creative thinking and excellent skills in application development using modern development tools will be utilized for the betterment of the company.

SKILLS

- Vast knowledge of developing and implementing applications based on client's needs.
- Experience handling popular developmental software such as HTML, CSS, JQuery and JavaScript.
- Good Experience of SQL Server and .NET development.
- Experienced in working on Design and developing databases.
- Excellent troubleshooting skills with an ability to engineer well-researched, responsive solutions after analyzing codes.
- Having knowledge of processes and tools to design state-of-the-art software solutions.
- Ten Years and Eight Months of professional programming experience in JavaScript, .Net, JSON, HTML, XML, REST, SOA, SOAP, Visual Studio, MS SQL Server, IIS, etc.
- Excellent practical skills, picking up optimal IT technologies
- Good experience in development for Web, Windows Applications and API.
- Strong database design and Query Optimization Skills.
- Very good logical and analytical skills and Excellent logic and decision-making skills also.
- Environment adaptability
- Hard + Smart work
- Capable of working independently with minimal supervision.

DOMAIN

Travel Domain Products (Flight, Hotel, Bus, Train, Holidays, Cab, Activity and Visa),
Insurance Domain and Reporting System (Admin Section)
Digital & Information Office Domain and Reporting System (Admin Section)
Healthcare Domain and Reporting System (Physician Review System)
Telecommunication Domain and Reporting System (Colt, NMTS)

TECHNICAL SKILLS

- **Technologies and Libraries:** .NET Framework 3.5, 4.0, 4.5, 4.6, 4.7, 4.8, 4.8.1, (ASP.NET, ASP.NET Core 3.0, 3.1, 5, 6, 7, 8, ADO.NET, Web Services, WCF, WEB API, MVC, Ajax, .NET Core, Azure DevOps, ReactJS, Angular, Entity Framework).

- **Languages:** C#, XML, HTML, CSS, LINQ

- **Scripting Languages:** JavaScript, jQuery, AngularJS 1.8, Angular and Node.js.
  Databases: MS-SQL Server 2022/2019/2012/2008 R2/2008, My SQL 5.0 and MongoDB

- **Projects:** Web, Windows, and API.

- **Development Tools:** Visual Studio 2022/2019/2017/2015/2013/2012/2010/2008, SQL Server Enterprise Manager, SQL Server Query Analyzer.

- **Server:** Internet Information Server (IIS).

- **Text Editor:** Notepad, Notepad++, Visual Studio Code, Sublime Text3, Web Storm

- **Browser:** Google Chrome, Mozilla Firefox, Internet Explorer, Microsoft Edge

- **Microsoft Offices:** MS Office 2016/2013/2010/2007/2003/2002/2000.

- **Operating Systems:** Win XP, Vista, Win-7, Win-8, Win-10, Win-11

- **Web Server:** IIS 6.0, IIS 7.5

- **Version Controls:** TFS, VSS, GIT, GitHub, GitLab, BitBucket, JIRA, Azure DevOps

- **Testing Tools:** Postman, SoapUI, Swagger

- **Framework:** .NET Framework, Entity Framework, AngularJS/Angular Framework

ACHIEVEMENTS

PROFESSIONAL EXPERIENCE

Company: Infomerica Pvt. Ltd. (PwC Limited)

Position: Sr. Software Developer.

Duration: 03 April 2025 – 02 September 2025

Company: Infosys Pvt. Ltd.(InfoPlus Private Limited)

Position: Sr. Software Developer.

Date: 29 April 2024 – 28-February-2025.

Company: Publicis Resources Pvt. Ltd. (Career Net Private Limited)

Position: Sr. Software Developer.

Duration: 25 April 2023 – 23 October 2023

Company: Persistent Systems Pvt. Ltd.(Speartalent IT Consulting Private Limited)

Position: Sr. Software Developer.

Date: 28 March 2022 – 05 January 2023

Company: PBFintech Pvt. Ltd. (Policy Bazaar)

Position: Sr. Software Developer.

Duration: 16 June 2021 – 02 March 2022

Company: Samsung India Electronics Private Limited (SIEL)(Collabera Technologies Pvt. Ltd.)

Position: Sr. Web Developer.

Duration: 10 Feb 2020 – 18 August 2020

Company: Easy Trip Planners Ltd. (EaseMyTrip)

Position: Sr. Web Developer.

Date: 09 May 2013 – 31 December 2019

PROJECTS

➢ **Project 1**

Position: Web Developer.

Based: Web Based.

Designed and developed **Query Management System (QMS)** in three-tier architecture and MS SQL Server 2008. This project helps collect and manage all customer queries from outside using the query form.

Responsibilities:

- Analyzing all modules (Admin, Team Lead, and Executive) according to user access.
- Designing all interfaces based on users' authorization.
- Implementing all modules as per product requirements such as Flight, Hotel, Bus, and Holidays.
- Writing technical documentation.

Environment: Windows 7, MS.NET (Visual Studio 2010, C#/C Sharp, Web service), JavaScript, jQuery, CSS, User Control and SQL Server 2008.

➢ **Project 2**

Position: Web Developer.

Designed and developed **Call Management System (CMS)** in three-tier architecture and MS SQL Server 2008. This project helps collect and manage all customer queries from outside using the query form.

Responsibilities:

- Integrate cube Dialer API to connect the call with the number.
- Socket Programming integration.

Environment: Windows 7, MS.NET (Visual Studio 2010, C#/C Sharp, Web service), Cube Dialer API, and SQL Server 2008.

➢ Project 3

Position: Web Developer.

Based: API Based.

Designed and developed **QMS API** for Organizations to create and maintain the query of flight, hotel, holidays etc. It has some modules such as **Admin, Team Leader, and Executive**.

Responsibilities:

- Designing Module Role wise and Product wise.
- Developing module authenticated by credential.
- Create web services for different businesses like WhatsApp,Facebook etc.
- Saving data using SQL Server database for future use.
- Improving performance based on user access.

Environment: Windows 7, MS.NET (Visual Studio 2010/2008, C#/C Sharp, Web Services)

➢ Project 4

Position: Web Developer.

Based: Web Based.

Designed and developed **Easy Office (CMS)** for Organizations to maintain user activities and booking details of flights and hotels. It has some modules such as **Admin, HR, Sales, IT, Support, and Account.**

Responsibilities:

- Designing User Interface (C#, Web Forms, User Control).
- Developing new visual components implementing core functionality for business process modeling.
- Loading Dynamic User Control without full post back.
- Saving data using SQL Server database for future use.
- Improving performance based on user access.

Environment: Windows7, Visual Studio-2013, C#, Web Forms, UserControl, WebServices, JavaScript, jQuery, CSS, SQL Server 2008R2.

➢ Project 5

Position: Web Developer.

Based: Web Based.

Designed and developed a **Bus** for the Organization to maintain user activities and booking details of the Bus. It has some modules such as **B2B, B2C, Corporate, and WhiteLabel.**

Responsibilities:

- Designing User Interface (C#, Web Forms, User Control).

- Developing new visual components implementing core functionality for business process modeling.

- Saving data using SQL Server database for future use.

- Improving performance based on user access.

Environment: Windows 7, MS.NET (Visual Studio 2013, C#/C Sharp, MVC, ASP.NET (Web Forms, Web User Control), Web Services, Web API), HTML, CSS, JavaScript, jQuery and AngularJS.

Project 6

Position: Web Developer.

Based: Web API.

Designed and developed **Bus API** for Organization to maintain user activities and booking details of Buses. It has some modules such as **B2B, B2C, Corporate, and WhiteLabel.**

Responsibilities:

- Designing User Interface (C#, MVC, WEB API).

- Developing new visual components implementing core functionality for business process modeling.

- Implementing many bus APIs for bus booking like AbhiBus, RedBus, E-travel Smart, TravelYari, Neeta, ITS, SRS, and VRL.

- Saving data using SQL Server database for future use.

- Improving performance based on user access.

- WEB API performance is very fast.

Environment: Windows 7, MS.NET (Visual Studio 2013/2010, C#/C Sharp, ASP.NET MVC, ASP.NET WEB API, Web Services).

➢ **Project 7**

Position: Web Developer.

Based: MVC, Web Forms.

Designed and developed the **KaromiProject(CDRF) Consumer delegation relationship forum** for Samsung Organization to maintain user activities and maintain the Customer Dispute System of Samsung products. It has some modules such as **Admin, Manager, Customer, Agent, and User.**

Responsibilities:

- Designing User Interface (C#, MVC, WEB API).

- Developing new visual components implementing core functionality for business process modeling.

- Implementing an API for fetching the delegation-related data from the database.

- Saving data using SQL Server database for future use.

- Improving performance based on user access.

- WEB API performance is very fast.

Environment: Windows 7, MS.NET (Visual Studio 2013/2015, C#/C Sharp, MVC, WEB API, Web Services) HTML, CSS, Javascript, Git and Github.

Project 8

Position: Web Developer.

Based: MVC, Web Forms.

Designed and developed **FIMS (Fixture Management System)** for Samsung Organization to maintain user activities and maintain Customer Franchise logo, Template, Add etc.

Responsibilities:

- Designing User Interface (C#, MVC, WEB API).

- Developing new visual components implementing core functionality for business process modeling.

- Saving data using SQL Server database for future use.

- Improving performance based on user access.

- WEB API performance is very fast.

Environment: Windows 7, MS.NET (Visual Studio 2013/2015, C#/C Sharp, ASP.NET MVC, ASP.NET WEB API, Web Services), Git and AngularJS.

➤ **Project 9**

Position: Sr. Web Developer.

Based: Web Forms, User Control, ReactJS, ASP.Net Core 6.

Designed and developed **Matrix** for Policy Bazaar Organization to maintain user's activities and maintain Customer activities, Lead details, Reporting System etc.

Responsibilities:

- Designing User Interface (C#, MVC, WEB API).

- Developing new visual components implementing core functionality for business process modeling.

- Saving data using SQL Server database, MongoDB for future use.

- Improving performance based on user access.
- WEB API performance is very fast.

Environment: Windows 10, MS.NET (Visual Studio 2019, C#/C Sharp, MVC, WEB API, Web Services), Git, BitBucket and ReactJS.

➢ **Project 10**

Position: Sr. Web Developer.

Based: MVC Core, C#, SQL Server.

Designed and developed **MRS (Matrix React System)** for Policy Bazaar Organization to maintain user activities and maintain Customer activities through this API.

Responsibilities:

- Designing User Interface (C#, MVC, WEB API).
- Developing new visual components implementing core functionality for business process modeling.
- Saving data using SQL Server database, MongoDB for future use.
- Improving performance based on user access.
- WEB API performance is very fast.

Environment: Windows 10, MS.NET (Visual Studio 2019, C#/C Sharp, MVC, WEB API, Web Services, SQL Server), Git and Github, Bitbucket.

➢ **Project 11**

Position: Web Developer.

Based: MVC, MVC Core, Web API, C#, SQL Server.

Designed and developed **Communication** for Policy Bazaar Organization to maintain user's activities and maintain Customer activities, manage the dialer, video call, WhatsApp chat, audio call etc.

Responsibilities:

- Designing User Interface (C#, MVC, WEB API, SQL Server).
- Developing new visual components implementing core functionality for business process modeling.
- Saving data using SQL Server database, MongoDB for future use.
- Improving performance based on user access.
- WEB API performance is very fast.

Environment: Windows 10, MS.NET (Visual Studio 2019, C#/C Sharp, MVC, WEB API, Web Services, SQL Server), Git and BitBucket.

➢ **Project 12**

Position: Sr. Web Developer.

Based: ASP.NET WebForms, Ajax, JavaScript, Web Service, C#, SQL Server.

Designed and developed **PRS (Physician Review System)** for Persistent System (Crawford Organization) to maintain user's activities and maintain Customer (Insurance, Claim, Status) activities, manage the Insurance related information etc.

Responsibilities:

- Designing User Interface (C#, ASP.NET, Web Service, SQL Server).

- Developing new visual components implementing core functionality for business process modeling.

- Saving data using SQL Server database, Active Directory for using Authenticate and Authorize the user.

- Improving performance based on user access.

- CDSWS Service to connect with Active Directory Domain Service (AD DS) for authentication and authorization to the users.

Environment: Windows 10, MS.NET (Visual Studio 2015, C#/C Sharp, ASP.NET, Ajax, Web Services, SQL Server), HTML, CSS, Javascript, Git, Azure and AngularJS.

➢ **Project 13**

Position: Sr. Web Developer.

Based: ASP.NET, Ajax, JavaScript, CDSWS Web Service, WCF, VB.NET, Visual Source Safe, SoapUI.

Designed and developed **PRSSelfRegistration** for Persistent System (Crawford Organization) to reset the password of users.

Responsibilities:

- Designing User Interface (VB, ASP.NET, CDSWS Web Service, JavaScript).

- Developing new visual components implementing core functionality for business process modeling.

- Improving performance based on user access.

- CDSWS Service to connect with Active Directory Domain Service (AD DS) for authentication and Authorization to the users.

Environment: Windows 10, MS.NET (Visual Studio 2015, C#/C Sharp, ASP.NET, Web Services, SQL Server), HTML, CSS, Javascript, Git, Azure.

➢ **Project 14**

Position: Sr. Web Developer

Based: Web Service, C#, XML.

Designed and developed **Document Converter Web Service** for Persistent System (Crawford Organization) to connect with Neevia Document Converter Pro Windows application for merging files and converting them into PDF files.

Responsibilities:

- Designing User Interface (C#, Web Service, XML).

- Developing new visual components implementing core functionality for business process modeling.

- To transfer the data from one location to another location. It is responsible only for this.

Environment: Windows 10, MS.NET (Visual Studio 2015, C#/C Sharp, ASP.NET, Web Services, SQL Server), Git, Azure.

➢ **Project 15**

Position: Web Developer.

Based: Web API.

Designed and developed **GoogleAds API** for Organizations to maintain advertisement activities on social media platforms. It has some modules such as GoogleAds, MetaAds and TikTokAds.

Responsibilities:

- Manage and Designing StarScape application (C#, MVC, WEB API, SQL Server).
- Developing new visual components implementing core functionality for business process modeling.
- Saving data using SQL Server database, MongoDB for future use.
- Improving performance based on user access.
- WEB API performance is very fast.

Environment: Windows 10, MS.NET (Visual Studio 2019, C#/C Sharp, MVC, WEB API, Web Services, SQL Server), HTML, CSS, Javascript, Git, Reactjs, Azure.

➢ **Project 16**

Position: Sr. Web Developer.

Based: ASP.NET, Ajax, JavaScript, CDSWS Web Service, WCF, VB.NET, TFS, SoapUI.

Designed and developed **NMTS API (Number Management Tracking System** for Infosys (Colt Organization) to reset the password of users.

Responsibilities:

- Designing User Interface (VB, ASP.NET, CDSWS Web Service, JavaScript).
- Developing new visual components implementing core functionality for business process modeling.
- Improving performance based on user access.
- CDSWS Service to connect with Active Directory Domain Service (AD DS) for authentication and Authorization to the users.

Environment: Windows 10, MS.NET (Visual Studio 2013, C#/C Sharp, VB/Visual Basic, ASP.NET, Web Services, SQL Server), TFS.

➢ **Project 17**

Position: Sr. Web Developer.

Based: ASP.NET, Ajax, JavaScript, CDSWS Web Service, WCF, VB.NET, TFS, SoapUI.

Designed and developed **NMTS(Number Management Tracking System** for Infosys (Colt Organization) to reset the password of users.

Responsibilities:

- Designing User Interface (VB, ASP.NET, CDSWS Web Service, JavaScript).

- Developing new visual components implementing core functionality for business process modeling.

- Improving performance based on user access.

- CDSWS Service to connect with Active Directory Domain Service (AD DS) for authentication and Authorization to the users.

Environment: Windows 10, MS.NET (Visual Studio 2013, C#/C Sharp, VB/Visual Basic, ASP.NET, Web Services, SQL Server), TFS.

➢ **Project 18**

Position: Sr. Web Developer.

Based: ASP.NET, Ajax, JavaScript, CDSWS Web Service, WCF, VB.NET, TFS, SoapUI.

Designed and developed **PMA (Portable Management Authority)** for Infosys (Colt Organization) to reset the password of users.

Responsibilities:

- Designing User Interface (VB, ASP.NET, CDSWS Web Service, JavaScript).

- Developing new visual components implementing core functionality for business process modeling.

- Improving performance based on user access.

- CDSWS Service to connect with Active Directory Domain Service (AD DS) for authentication and Authorization to the users.

Environment: Windows 10, MS.NET (Visual Studio 2013, C#/C Sharp, VB/Visual Basic, ASP.NET, Web Services, SQL Server), TFS.

➢ **Project 19**

Position: Senior Software Developer.

Based: MVC, MVC Core, Web API, C#, SQL Server.

Designed and developed **CCO (CashCutOff), DI (DividendIncome), II (InterestIncome)** for PwC Organization to maintain insurance related things and maintain Customer activities support like export and import in excel Reporting.

Responsibilities:

- Designing User Interface (C#, MVC, WEB API Core, NLog, SQL Server).

- Developing new visual components implementing core functionality for business process modeling.

- Saving data using SQL Server database, MongoDB for future use.

- Improving performance based on user access.

- WEB API performance is very fast.

- Hangfire Implementation for scheduling the targeting the job

Environment: Windows 11, MS.NET (Visual Studio 2022, C#/C Sharp, MVC, WEB API, Web Services, SQL Server), Angular, React.js, Git, Github Co-Pilot Azure DevOps,.

EDUCATION/CERTIFICATION

- Completed **Masters of Computer Application** in 2010 from IGNOU.
- Training in Microsoft .Net

PERSONAL DETAILS

Name	Azhar Hussain
Father's Name	Abdul Hafeez
DOB	5th July, 1984
Hobbies	Listen to music, sing a song, watch movies in my free time, play chess, exercise for fitness, and surfing
Language	Hindi, Urdu, English
Interest	To work honestly, Surfing the internet.

Immediate Joiner

DATE : 26-Jan-2026   Azhar Hussain
PLACE : Gorakhpur, Uttar Pradesh, India   Signature
